

MAINTENANCE TECHNICIAN V-ELECTRICIAN

DEFINITION:

Under the supervision of the assigned supervisor, performs a variety of skilled tasks involved in the maintenance, repair and installation of electrical equipment and related systems.

DISTINGUISHING CHARACTERISTICS:

The Maintenance Technician V has a higher degree of journey level skills than entry level positions in the series and incumbents have five years of journey-level experience. The Maintenance Technician III - classification is an entry-level position in the Maintenance Technician series. Incumbents work independently and perform a variety of duties. Incumbents have at least two years general maintenance experience. The Maintenance Technician IV is an intermediate journey -level classification in the Maintenance Technician series. Incumbents have completed an approved apprenticeship program in a specific trade. Incumbents are expected to have four years of journey -level experience. The Maintenance Technician VI classification serves as the senior technician who can oversee special projects. Incumbents may serve as the backup Foreman and typically have six years of journey-level experience in a specific trade and/or have completed an approved apprenticeship program in a specific trade.
